RULE 14 INDIVIDUAL RISK PREMIUM MODIFICATION

The Individual Risk Premium Modification Plan applies separately to the property and liability coverage parts which generate at least \$2,500 in premiums at basic limits before the application of modifications.

The modifications must be applied uniformly in a non-discriminatory manner for all eligible classes of risk.

Rating Procedures

The following modifications may be applied to recognize special characteristics of the risk that are not fully reflected in the premium.

The total amount of credit or debit developed using the following table may not exceed 15 percent.

Expense reductions (that have been filed by companies as part of an Expense Reduction Plan and approved for use in New York) include only expenses that can be demonstrated.

The credit or debit developed by the use of this rule is applied after all other rating procedures.

The overall effect of this plan when used in conjunction with any other plan shall not, in the aggregate, provide for modification of rates in excess of 25%.

Individual underwriting files shall contain the specific criteria, relative to the risk being rated, and document the particular circumstances that support each debit or credit.
